

LEWISBURG, MISS.

EXCOMPROISING OPPOSITION
TO THE STOCK LAW.Resolutions Passed at a Meeting of
the Citizens Denouncing the
Law as Oppressive.

(CORRESPONDENCE OF THE APPEAL.)

LEWISBURG, MISS., May 5.—A meeting of the citizens of Lewisburg and vicinity was held May 1, 1886, expressive of their indignation of the obnoxious law passed by our late Legislature known as the stock law. Mr. T. J. Wilroy was called to the chair and J. C. Longstreet was selected as secretary and B. F. Ross assistant secretary. The object of the meeting was explained by the chairman.

On motion of W. J. Wilroy, that a committee of six be appointed by the chairman to draft suitable resolutions, expressing the sense of the meeting, the following named gentlemen were chosen: E. B. Lauderdale, Samuel Shand, B. F. Ross, J. T. Jones, W. J. Wilroy and P. Vangun, when the following resolutions were unanimously adopted.

Resolved, That the law enacted by the late Legislature, known as the three-wire fence law, requiring the confining of sheep, hogs and goats, and requiring the Board of Supervisors to fence the County of Soke, is unjust, inexpedient and unnecessarily expensive.

Resolved, That we request the Board of Supervisors that they never appropriate one dollar towards the building of a fence around the county, or to contribute anything to the advancement of said law.

Resolved, That we will disregard said law, and that we will stand by each other, taking no advantage of the provisions until such time as the obnoxious law may be repealed by the next Legislature.

Resolved, That the Hon. Sam Powell, whom we have often honored, done his constituents great injustice when he carried this odious law through the Senate.

Resolved, That the Hon. A. S. Melgar has forfeited the confidence of many of his friends by his zealous advocacy of this law, after his many declarations during the canvass that if elected he would not vote for said law without submitting it to the people.

Resolved, That we return our sincere thanks to the Hon. A. S. Buchanan for the firm stand taken by him in the Legislature in opposition to the passage of said law.

Resolved, That the Secretary of this meeting furnish a copy of its proceedings to the DeSoto Times, Memphis Appeal, Jackson Clarion and Natchez Journal, with request to publish.

PREPARE TO SHUDDER.

A Chastity Story of a Disappointed
Bridegroom, a Dog and a
Woman's House.

NEW YORK, May 4.—Otto Metz, the proprietor of the hall in East Eighth-street, in which the Third Avenue strikers hold their meetings day and night, is a short wiry German, who helped Mr. Gertrude Vanderbilt build part of the Fourth Avenue tunnel, and says he lost \$45,000 by it. After that he went to the African diamond fields, didn't get rich there and joined Stanley's expedition. Then he came back to America and opened his saloon and now he is prospering. He lets his hall to anybody who wants to use it. Last winter Mr. Metz left his German assistant to run things in the saloon and the hall, while he himself went to Eighty-first street and wooed Miss Fannie Knoepf. The marriage was set for Tuesday of last week, but had to be postponed on account of the strike. The reason and the hall took all the bridegroom's time. To-night Mr. Metz met Chairman O'Donnell of the strikers' committee and asked him when he thought the strike would be over.

"May be next fall," Chairman O'Donnell replied, carelessly; "least-ways, when both sides are out of money."

This disappointed Mr. Metz sadly. He has lost it all lately, not altogether on account of the strike, though that keeps him up at all hours. A Knight of Pythias lodge had hired the hall which the strikers now use. Among other things which they stocked it with was a coffin in which was the skeleton of a woman. This Mr. Metz has transferred to his sleeping-room to get it out of the way of ruminating strikers. He had gone to sleep the other night when his massive Newfoundland set up a great racket. The dog had torn the pall off the coffin, tossed off the lid and was dragging the skeleton gleefully into the hall when Metz got after him and rescued the exhumed bones. The dog is now chained in an outer room all night to keep him from going for the bones again.

A MOTHER'S TERRIBLE AGONY.

Her Intellectual Efforts to Rescue a
Drowning Child From the
Depths of a Well.

HORNELLVILLE, N. Y., May 4.—Frazier French and his family live on the old Mines farm, in the town of Bradford, this county. In the farm-yard is a deep well, with a low curb, the water being drawn up by an old-fashioned sweep. On Saturday all the family were absent from home except Mrs. French and her two-year-old son, Farmer French came home at noon. There was no one in the house. He went into the kitchen. On the table was a slate, on which was written in a hasty scrawl:

"Baby and I are in the well."

French ran to the well. Looking down he saw his wife in the water clinging to the wall, but apparently dead. Alva Morris, a neighbor, was passing at the time and responded to the farmer's cries for help. Morris let himself down in the well and fastened a rope around Mrs. French, and she was drawn to the top. She was alive, but unconscious. She was restored with difficulty. As soon as she revived she asked for her child. The body of the child was found at the bottom of the well, in ten feet of water, and drawn to the surface by means of a rope.

"At 10 o'clock this afternoon," said Mrs. French, "I went to the well after a pail of water, taking baby along. I saw that a board on the curb was loose and ran back to the house to get a hammer and nails to fasten the board and thoughtlessly left the baby alone. When I returned he was gone. I looked in the well and saw him struggling in the water. Thinking that some one might be in the house soon I rushed back and wrote on the slate that we were in the well, so that we could have help as soon as possible. I then hurried to the well again and let myself down to the water by the chain in the well. I succeeded in getting the baby out of the water with one hand, while I held myself above the water with the other. I then placed one foot

in a niche on one side of the wall and the other foot on the opposite, and then braced myself so I could keep above the water, which was above my waist. The baby was alive, and having the use of both hands and arms, I soon brought him to the surface and helped him to the top. Called the child and myself were terribly chilled by the water. I shouted for aid until my voice was gone, and then, feeling that we must both die from exhaustion and cold unless I could reach the top in some way, I began to work myself up, using one hand and my feet. Little by little I crept upward by aid of the chain in the well, and in half an hour I was almost within reaching distance of the top of the well. How my strength ever held out I do not know. I stepped to rest, and thought of towing the baby up over the curb. If I had had length enough in my arms, I know I could have done so, but they were so tired and weak. After resting awhile I was feeling around for another place to put my foot, a little higher, to draw myself up, when I lost my footing entirely and we fell back into the water. The baby was knocked out of my arms, and when I came to the surface of the water I could not find him. I remember grabbing about among the fishes in the well, and that was all until I came to after being rescued. I must have clung to the well over an hour unconscious.

THE HYATT FILTER
DEFENDED AS BASED UPON NAT-
URAL PROCESSES.

Mr. Joseph Wadly of Greenville, Miss., Answered and Gen. Greene Defended.

To the Editors of the Appeal:
NEWARK, N. J., May 1.—In your issue of April 24th, last, appeared a communication from Joseph Wadly of Greenville, Miss., on the Memphis water question, doing great injustice, both to the Hyatt system of direct filtration, and to the Hyatt system of water purification. Your correspondent expresses surprise that Gen. Greene suggests our system, because filtration removes nothing more than the suspended matter, and the organic matter is still in solution. If that is true of filters, it is none the less so of settling basins. The objection of this is not in the statement per se, but in connecting it with the Hyatt system, which is not a filtering apparatus merely, but a system based on natural laws and scientific principles, and especially adapted to removing the very organisms in solution and microscopically minute suspension, which Mr. Wadly says are not removed by ordinary filtration. We beg leave to briefly explain:

It is first prepared the water for filtration by a process in all essential respects like that by which nature purifies every drop of spring or well water. As water passes naturally through the surface layers of soil, it takes up more or less of the earth salts found everywhere. These are the impurities in suspension and solution, changing their forms and causing them to adhere to each other in flocculent masses, which are strained out as the water percolates through the strata. In precisely the same manner the Hyatt system, by an ingenious and delicately adjusted apparatus, subjects the water to similar treatment, precipitating organisms in solution, massing the minute particles of clay, and entirely filtering out both by means of a bed of sand and comminuted coke that is not allowed to become clogged or foul, but is as clean and good after years of use as it was when first put in.

Your correspondent further says that "there is no advantage gained by the process, and it is impracticable for such quantities, while the retarding process has proved a success and at a much less cost."

In this statement he is diametrically opposed to scientific men throughout the world. Even filtration alone will take out a great many impurities that settling tanks will not. For instance, such things as are of small specific gravity and never settle. Filtration is rapid. Settling tanks are slow. It takes months for the finest particles of clay to settle, and meantime the water is not improved by standing in an impure state, as this is just the condition most favorable to vegetable growth and the production of animalcules. In the second place, there is no necessary limit to the capacity of our system. No matter how great or how small the supply, we can purify it without interruption.

In the third place, our system is far less expensive and far more effective than the basins suggested. In the city of St. Louis in March, 1883, there were 15,000,000 gallons of water practically clarified as fast as it entered, by the chemist of the Missouri Water Company, for the nominal cost of less than one-half cent per 100 gallons, or between \$40 and \$50 per 1,000,000 gallons.

We will give any reasonable and sufficient guarantee that our system will do the work perfectly and satisfactorily, for about one-tenth of that sum, including the interest on the first cost of our plant and all the running expenses.

As to the relative expense of cleaning our filters, and keeping two or three reservoirs clean, we need only say that in our system water requires no mechanical labor. It is perfectly done by the force of the water, about 1 per cent being used for that purpose. We do not desire to take up too great a space to set ourselves right in this matter, but would like to say that we will send to anyone who desires it a copy of our large circular, giving full descriptions of our system in all its details, with testimonials from well-known and honored citizens using our plants in your section of the country. Respectfully yours,

THE NEWARK FILTERING CO.,
141 Commerce St., Newark, N. J.

MRS. ADDISON DOUGLASS.

Affectionately Inscribed to Those Who Love Her.

The Angel of Death to "our angel in life, Come with gentleness and calm and tender, Unveiled her life's last splendor. There in the bloom of immortal youth, Her soul in earthly pain can reach her, Her soul will wait at the fount of truth, With love for its nearest teacher. For she has gone to that fair shore, Where sorrow oppresseth the soul no more, Nor the ravings of grief can find her, Nor the hand will drink the fount divine, In bright Eden streamlets flowing, And glad glories of the love divine, On her face be forever glowing. Oh, ye who wait the lovely dead, Think not of her in dying, Think of the crown that angels twine, Thus a victress of the fabled prize, Never again will farewell words In that beautiful land be spoken, Christ's love will form each link and knot That was here so rudely broken."—Elizabeth L. Sargent.

Sore Eyes

The eyes are always in sympathy with the body, and afford an excellent index of its condition. When the eyes become weak, and the lids inflamed and sore, it is an evidence that the system has become disordered by Scrofula, for which Ayer's Sarsaparilla is the best known remedy.

Scrofula, which produced a painful inflammation in my eyes, caused me much suffering. I have a number of years. By the advice of a physician I commenced taking Ayer's Sarsaparilla. After using this medicine a short time I was completely

Cured

My eyes are now in a splendid condition, and I am as well and strong as ever.—Mrs. William Gage, Concord, N. H.

For a number of years I was troubled with a humor in my eyes, and was unable to obtain any relief until I commenced using Ayer's Sarsaparilla. This medicine has effected a complete cure, and I believe it to be the best of blood purifiers.—C. E. Upson, Nashua, N. H.

From childhood, and until within a few months, I have been afflicted with weak and sore eyes. I have used for these complaints, with beneficial results, Ayer's Sarsaparilla, and consider it a great blood purifier.—Mrs. C. Phillips, Glover, Vt.

I suffered for a year with inflammation in my left eye. Three ulcers formed on the ball, depriving me of sight, and causing great pain. After trying many other remedies, to no purpose, I was finally induced to use Ayer's Sarsaparilla, and

By Taking

three bottles of this medicine, have been entirely cured. My sight has been restored, and there is no sign of inflammation, sore, or ulcer in my eye.—Kendall T. Bowen, Sugar Tree Ridge, Ohio.

My daughter, ten years old, was afflicted with Scrofulous Sore Eyes. During the last two years she never saw light of any kind. Physicians had pronounced her case hopeless, but with no permanent success. On the recommendation of a friend I purchased a bottle of Ayer's Sarsaparilla, which she commenced taking. Before she had used the third bottle her sight was restored, and she can now look steadily at a brilliant light without pain. Physician, Dr. W. E. Sutherland, Evangelist, Shelby City, Ky.

Ayer's Sarsaparilla,

Prepared by Dr. J. C. Ayer & Co., Lowell, Mass. Sold by all Druggists. Price \$1; six bottles, \$5.

Pennyroyal Pills.

"CHICHESTER'S ENGLISH"

The Original and Only Genuine.

Safe and always Reliable. Beware of Imitations. Indispensable to LADIES.

As a purgative for "Chichester's English," and take no other, or inclose (stamp) to get for particulars in letters by return mail to W. A. HOFFMAN, Chemist, 2311 Madison Square, Philadelphia, Pa.

Fifty Years a Sufferer from

Catarrh!

WONDERFUL TO RELATE.

"FOR FORTY YEARS I have been a victim to CATARRH—three-fourths of the time suffering from EXCORIATING FLESH ACROSS MY FOREHEAD AND MY NOSE-TRILS. The discharges were so offensive that I hesitate to mention it except for the good it may do some other sufferer. I have spent my forty years of suffering to obtain relief from the doctors. I have tried patent medicines—every one I could learn of—from the four corners of the earth with no relief. And AT LAST (67 years of age) have met with a remedy that has cured me entirely! I made me a new man. I weighed 125 pounds and now weigh 146. I used thirteen bottles of the medicine, and the only regret I have is that being in the humble walks of life I may not have influence to prevail on all catarrh sufferers to use the same cured me."

Gulley's Pioneer Blood Renewer.

"No. 267 Second street, Macon, Ga."

"Mr. Henry Cheves, the writer of the above, formerly of Crawford county, now of Macon, Ga., merits the confidence of all interested in catarrh."—W. A. HOFFMAN.

A SUPERB

FLESH PRODUCER & TONIC

Gulley's Pioneer Blood Renewer.

Cures all Blood and Skin Diseases, Rheumatism, Scrofula, Old Sores. A perfect Skin Medicine.

If not used for the cure of the above, it will be found on receipt of price. Small bottles, \$1; large, \$1.50.

WILBOR'S COMPOUND OF

PURE COD LIVER

OIL AND LIME.

Wilbor's Cod-Liver Oil and Lime.

Persons who have been taking Cod-Liver Oil will be pleased to learn that Dr. Wilbor has succeeded in purifying the oil of several professional gentlemen, in combining the pure Oil of Lime in such a manner that it is pleasant to take, and its effects in Lung complaints are truly wonderful. Very many persons whose cases were pronounced hopeless, and who had taken the clear Oil for a long time without marked effect, have been cured by this compound. It is pure, safe and sure and the genuine. Manufactured only by B. A. Wilbor, Chemist, Boston. Sold by all druggists.

CONTAGIOUS

Diseases are Prevalent all over the World.

I am a native of England, and while I was in that country I contracted a terrible blood poison, and for two years was under treatment as an out-door patient at Nottingham Hospital, England, but was not cured. I suffered the most agonizing pains in my bones, and was covered with sores all over my body and limbs. I had vertigo and deafness, with partial loss of sight, severe pains in my head and eyes, which nearly drove me crazy. I lost all hope that I could be cured, and was about to give up, when I was introduced to this city, as well as by a prominent physician in New York having no connection with the hospital.

I saw the advertisement of Swift's Specific, and I determined at once to give it a last resort. I had given up all hope of being cured, as I had gone through the hands of the best medical men in England, and I was told that I was as good as dead. I had given up all hope of being cured, as I had gone through the hands of the best medical men in England, and I was told that I was as good as dead. I had given up all hope of being cured, as I had gone through the hands of the best medical men in England, and I was told that I was as good as dead.

I saw the advertisement of Swift's Specific, and I determined at once to give it a last resort. I had given up all hope of being cured, as I had gone through the hands of the best medical men in England, and I was told that I was as good as dead. I had given up all hope of being cured, as I had gone through the hands of the best medical men in England, and I was told that I was as good as dead.
